Cambridge International Examinations
Our involvement with QTI

- We were involved in the initial development of QTI 2
- We have been transitioning to a digital test production workflow over the past four years
- Our existing test schema is based on QTI 2.1 but has been extended to fit our specific requirements
Experience of QTI

Our test content is used in several ways:

- Paper-based tests
- On-screen tests
- Partner on-screen tests

Our key issue: Maturity of adoption

- Many vendors have heard of QTI
- Some vendors claim to support QTI
- Support is usually limited

How can we better support adoption?
