

2016 Learning Impact Leadership Institute The Future of EdTech Starts Here!

23 - 26 May 2016 - San Antonio, Texas

The Learning Impact Leadership Institute, established in 2007, is truly unlike any other education conference you have ever attended! It's not only a conference, but also a vital community of education and technology leaders from around the world working together to advance progress towards putting in place an open architecture to support next generation digital learning.

Next Generation Digital Learning Lightning Speakers and Review Panel Participants

Vibrant plenary sessions will feature a series of 15-minute lightning talks by recognized industry leaders focused on defining the "next generation of digital learning" to help the education community realize the state of the art in learning platforms, tools, content, apps, assessment and analytics. The talks will be followed by a response panel comprised of Higher Ed and K-12 Institution leaders.

K-12 and HED Summits: Creating the Open Ecosystem for Academic Digital Transformation

K-12 Summit

The IMS K-12 member community is driving towards establishing the K-12 Centers of Excellence to accelerate progress towards an integrated digital curriculum and next generation digital learning for the 21st century. The end goal of this important initiative is to create an easy-to-use 'playbook' to streamline the learning curve for K-12 curriculum leaders and districts who are working towards integrating digital curriculum, tools and data. This 1/2 day Summit for K-12 District leaders will provide an update on this exciting project, but more importantly Summit participants will collectively identify ideas and priorities to help accelerate progress in transitioning to fully integrated digital curriculum to enable personalized learning.

HED Summit

A resounding need is emerging across the Higher Education sector for resources to support the process of implementing IMS standards and practices to make it significantly easier to support next generation digital teaching and learning. To lead off the 2016 Learning Impact Leadership Institute, we will gather HED academic and IT leaders for a 1/2 day Summit to share the latest information and updates about the progress being achieved by the work of the education community to achieve "plug and play" interoperability, but more importantly to develop ideas to accelerate adoption and inform IMS priorities for the next 3-5 years. Your ideas and leadership are needed to help shape the future of educational technology.

Interactive Breakout Sessions

Over 60 breakout sessions by industry leaders featuring practical strategies and effective practices to enable next generation digital learning across the following highly relevant program tracks:

- Digital Credentialing, Badging & Competency-Based Education
- Transitioning to K-12 Digital Curriculum & Interoperability
- e-Assessment Transformation
- Learning Data & Analytics
- Higher Education Next Generation Digital Learning Leadership
- Plug & Play Ecosystem of Platforms, Apps & Tools
- Integrated & Effective Digital Curriculum
