

DRiEAM

**Take Canvas to the next level: deliver the best
user experience with seamless LTI plugins**

Matthijs Wanders
Developer

We are **DRiEAM**

Established 2014

20+ Employees

55 Customers in 6 Countries

Reaching over 450 000 students

Examples of LTI plugins

StudyCoach

Improve student retention by providing coaches with an overview of relevant student analytics gathered across courses.

PeerConnect

PeerConnect presents rich information about participants directly in Canvas to get them connected and stimulate in-class networking.

FEED Pulse

REFLECT

 qualtrics.

 **MediaHaven**
media asset management

How LTI plugins help to deliver the best user experience

LTI plugins allow you to **extend** functionality in Canvas or **visually integrate** Canvas with other software used in your school

But there is more, a good **balance** between all aspects of the Honeycomb is required to deliver the best user experience.

Honeycomb model (Peter Morville)

Custom LTI plugin development

- Proven LTI framework (front-end and back-end) & infrastructure
- Structured 5 phases development approach, incl. validation phase with interactive prototype
- IMS contributing member
