IMS Europe Summit 2019

Advancing Next Generation EdTech, Digital Credentials, and Actionable Data

BARCELONA, SPAIN
10-11 OCTOBER 2019

IMS Standards & GDPR Panel

IMS Global members are leading the way to improved student privacy and security. IMS recently released its new Security Framework to define a common approach for secure and private data exchange for all of its service definitions. LTI Advantage, OneRoster, Edu-API, and other IMS specifications use the new IMS Security Framework. In Europe, GDPR gives us guidelines on how to handle student privacy and security. In this session, we invited experts to share with us their ideas on the connection between the IMS standards and the GDPR and to discuss if the specifications are GDPR-proof.

Colin Smythe

Stephan Geering

Global Privacy Officer
Blackboard

Steven Threadgold

Head of Product Management
Itslearning

Format

Brief statements from the two panelists

Initials Questions

Questions from the floor

QUESTION 1

Now that GDPR is in action, are there any concerning trends that have arisen, in these early days, for the EdTech community?

QUESTION 2

What are the implications for Learning Analytics arising from the GDPR legislation?

QUESTION 3

Have you seen any differences of interpretation of the application of GDPR legislation for EdTech in different countries?

QUESTION 4

What are the implications for the LTI Advantage standard arising from the GDPR legislation? For example, caused by data deletion requirements for chained Tools, etc.

Questions & Comments?

THANK YOU!
